OBJECTIVE

I'm an Information Technology student with expertise in web development using the MERN stack (React, Node.js, Express, MongoDB). Passionate about creating intuitive, high-performance applications, I have a strong foundation in problem-solving and teamwork, honed through hackathons and collaborative projects. I strive to develop innovative solutions that enhance user experiences and drive business success while continuously seeking opportunities to learn and grow in dynamic tech environments.

EDUCATION

12th standard, science stream , Arjun English High School	2021 - 2022
Bachelor's in Information Technology, Shree Swaminarayan Institute of Technology	2022 - 2026

SKILLS

- **UI/UX Design**: Skilled in creating intuitive and user-centered interfaces using Figma and Adobe XD; strong understanding of design principles and accessibility standards.

- **Web Design & Front-End Development**: Skilled in HTML5, CSS3, JavaScript, and responsive frameworks like Bootstrap and Tailwind CSS, with a focus on creating functional and visually appealing websites.

- **Research & Analysis**: Capable of conducting user research, usability testing, and translating findings into actionable design improvements.

- **Soft Skills**: Strong communicator with experience in cross-functional teamwork. Skilled in active listening, presenting ideas, giving/receiving feedback, and engaging with both technical and non-technical audiences to achieve shared goals.

EXPERIENCE

SIH internal Heckathon Winner   Shree Swaminarayan Institute of Technology

- An AI-driven career platform offering smart job matches, resume insights, and mentorship tools. Built with Python, Django, and ML to simplify career discovery and empower students with clarity and confidence.

Tic-Tac-Toe Heckathon   Dhirubhai Ambani Institute of Information and Communication Technology

- A minimal web-based productivity OS designed to help users focus, plan, and create. Seamlessly integrates tasks, notes, and scheduling with a clean UI and lightning-fast performance. Built to make time your ally.

PROJECTS

[Hello World](#) *An AI-powered career platform with smart job matches, resume tools, and mentorship, built with Django and ML to guide student career paths.*

[Auth-API](#) Developed a secure authentication system with Node.js, Express, JWT, and MongoDB for scalable user management and role protection.

[AI-carrier Advisor](#) A web-based productivity OS designed to eliminate distractions and enhance user focus, built with React.js and Firebase.

EXTRA-CURRICULAR ACTIVITIES

- I find balance and creativity through dance, badminton, drawing, and reading. These activities keep me grounded while fostering my passion for self-expression and personal growth. Podcast listening allows me to stay updated on new ideas and innovations, inspiring me to bring fresh perspectives into both my personal and professional life.
